DETAILED ACTION

Applicant's election of SEQ ID 16 in the reply filed on July 05, 2005 is acknowledged. Applicants have traversed on the grounds that the lack of unity should be withdrawn because the shared technical feature is a peptide chemically modified with PEG. Given the plurality of peptides of claim 15, for example, there are hundreds of thousands of peptides that are claimed that do not share a common core structure. Therefore, despite have a common PEG structure attached to different peptides does not grant the pegylated peptide common core structure. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-28 are rejected under 35 U.S.C. 102(a) as being anticipated by Mochida Pharmaceuticals Co., LTD, EP 1 323 731 A1. Mochida Pharmaceuticals discloses the instantly claimed peptides, the elected SEQ ID 16 peptide, and their method for delivering substances into the cell; see entire document and claims 1-8, and 13. Mochida Pharmaceuticals further discloses modifications of the peptides that include pegylation for the purpose of improving

in vivo stability, see paragraph [0097]. Therefore the instantly claimed invention is anticipated by Mochida Pharmaceuticals.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-28 and the elected species SEQ ID 16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8, and 13 of copending Application No. 10/398,933. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application '933 claims the same peptides and the elected species and discloses them as being further modified with polyethylene glycol, PEG.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
